NEXT IS NOW!

Participant's Guide

Are you ready to create, lead, and innovate?

TEENpreneurship 2025 is more than just a holiday camp; it's a launchpad designed to guide young people (ages 12–17) in discovering their unique talents, building confidence, and exploring exciting future career paths, starting now.

By nurturing self-awareness and practical skills today, we empower the next generation of creators, entrepreneurs, and leaders to shape their future with purpose and resilience.

Through fun, hands-on breakout sessions, engaging games, and dynamic group activities, participating teenagers will:

1. Discover their identity and strengths, forming a strong foundation for future success.
2. Gain essential problem-solving and practical life skills.
3. Unleash creativity through innovation.
4. Learn teamwork and cultivate a resilient mindset.
5. Connect their passions to exciting future career opportunities.

All sessions are led by experienced mentors dedicated to providing a safe, supportive, and fun learning environment.

Choose ONE Breakout Group

Each teen will select one group to focus on for the entire 5-day bootcamp, ensuring deep engagement and skill development. Each group offers practical, creative, and fun learning guided by experienced mentors and professionals.

Resin Arts

Learn to design beautiful accessories, such as keychains, coasters, and trays, using resin, a cool, glass-like material. You'll gain hands-on experience mixing, colouring, and molding resin into artistic products. This session also helps develop problem-solving skills as teens navigate the creative process.

Activity:	Participants might begin by sketching design ideas, then move to mixing vibrant pigments with resin for their first keychain, guided step-by-step through the crafting process.
Outcome:	By the end of the program, participants will create their own unique resin art product line and learn how to brand and sell their pieces as mini-businesses.
Who is this for?	Ideal for teens who enjoy hands-on crafting, design, have an eye for detail, and are interested in creating tangible products.
Considerations:	While all activities are supervised, this session involves working with liquid resin and molds. Safety guidelines will be strictly followed.

Fashion

Discover how fashion can be a powerful tool for expressing culture, identity, and values. Teens will learn about eco-friendly materials, learn basic sewing, styling, and how to launch creative clothing ideas. Beyond design, teens will develop problem-solving skills as they overcome creative challenges and learn about sustainable practices.

Activity:	A typical day could involve learning basic hand-sewing stitches, sketching garment designs based on a theme, or experimenting with fabric textures and eco-friendly materials.
Outcome:	Participants will design and create a wearable piece, gaining foundational knowledge in fashion entrepreneurship and sustainability.
Who is this for?	Perfect for aspiring designers, eco-conscious teens, or those interested in personal expression through style and the basics of clothing creation.
Considerations:	Participants will be introduced to basic sewing techniques; no prior experience is necessary.

Creative Arts

Dive into the captivating world of poetry, acting, painting, dance and storytelling. Teens will be guided to express themselves through various creative channels, building confidence on stage and in life. This session fosters strong communication and self-expression skills.

Activity:	A session could involve collaborative storytelling exercises, individual poetry writing, character improvisation games, or a guided painting activity focusing on emotional expression.
Outcome:	Participants will showcase a mini-performance or art piece, developing crucial communication skills, self-expression, and creative thinking.
Who is this for?	Suits imaginative teens who love storytelling, performing, exploring emotions through art, or those looking to boost their public speaking confidence.
Considerations:	This session encourages self-expression and stepping out of one's comfort zone, which can be incredibly rewarding for both introverted and extroverted teens.

Game Design

Explore the fun side of technology! Teens will experiment with game design, which includes game development, game arts and narrative. All sessions are beginner-friendly and highly interactive, building strong problem-solving and logical thinking skills.

Activity:	Participants might engage in block-based coding to make a character move in a simple game or brainstorm game mechanics for their own project.
Needs:	A laptop is required for this session.
Outcome:	Participants will build their own basic game acquiring tech skills that can spark future gaming careers.
Who is this for?	Great for curious minds interested in how things work, gaming, building with technology, or exploring future tech careers.
Considerations:	Please ensure your ward brings a functional laptop. No prior game design experience is needed.

Agribusiness

Discover how to make healthy, tasty food products like fresh juice, yoghurt and popsicles. Learn the basics of food safety, packaging, and how to turn everyday ingredients into profitable products. This session emphasizes practical life skills related to nutrition and entrepreneurship.

Activity: One day could be dedicated to exploring fruit preservation techniques from selecting the right fruits, learning how to dry and store them, to experimenting with simple homemade vinegar and juice shots. Teens will also get hands-on with making fruit salads, testing flavour combinations, and understanding how to safely preserve freshness.

1. **Outcome:** Participants will develop and brand their own food product sample, while learning about food processing, hygiene, and business basics.
2. **Who is this for?** For teens interested in healthy living, food science, curious about how to turn everyday ingredients into products, or those with an entrepreneurial spirit.
3. **Parental/Guardian Considerations:** This session involves handling food ingredients in a safe and hygienic environment. Dietary restrictions or allergies should be communicated upon registration.

Eco-Craft

This hands-on session introduces teens to the art of turning scrap metal into meaningful sculptures. With a focus on creativity, tool safety, and design, participants will explore how upcycling can lead to powerful self-expression and even business ideas.

Activity:	Design and sketch sculpture ideas - Learn safe use of tools (angle grinder, cordless drill) - Build a personal sculpture - Present their work in a mini showcase
Outcome:	Completed metal sculpture - Basic sculpting and power tool skills - Boosted confidence and creativity - Introduction to art-based entrepreneurship
Who is this for?	Teens who enjoy building, hands-on activities, creative thinking, and turning ideas into something tangible.
Considerations:	All activities are supervised with a strong focus on safety and fun. Safety guidelines will be strictly followed.

Content Creation

1. **What it's about:** Lights, camera, action! Teens will explore how to plan, film, and edit engaging content for platforms like YouTube, TikTok, and more. Learn professional tricks for shooting great videos and authentically sharing your voice online. Participants will not only master filming techniques but also build communication skills as they craft their unique online brand.

2. **Typical Day/Activity:** A session might involve brainstorming video ideas for a chosen platform, practicing camera angles and lighting techniques, or using editing software on their smartphone to assemble short clips.

3. **Needs:** A smartphone is required for this session.

4. **Outcome:** Participants will produce a short, edited video and learn how to build an authentic online brand.

5. **Who is this for?** Excellent for tech-savvy teens who love social media, aspire to be YouTubers or TikTok creators, or want to share their voice and stories online.

6. **Parental/Guardian Considerations:** Please ensure your ward brings a functional smartphone with sufficient storage. Discussions around online safety and responsible content creation will be part of the curriculum.

Safeguarding

TEENpreneurship 2025 is meticulously designed with robust safeguarding and child protection protocols, guaranteeing a secure and nurturing environment for all participants.

All mentors and staff undergo thorough background checks and receive mandatory, regular safeguarding training, adhering to a strict Code of Conduct. We maintain appropriate staff-to-child ratios, and a Designated Safeguarding Lead is always on-site to oversee all safety matters.

Furthermore, comprehensive risk assessments are conducted for all activities and venues, and qualified first-aiders are always available.

We are committed to open communication with guardians, and clear channels are in place for any concerns you may have, ensuring your peace of mind while your ward explores, learns, and innovates with us.

Why Join TEENpreneurship 2025?
Because the world is changing fast, and so are you! “Next Is Now” means that the future is already here, and we don’t wait to grow, lead, or create – we start now. Join us to build, learn, and have fun doing it!
